

A cutting edge technology in the field of Immunology  
**SINGULEX®**, Erenna® Immunoassay System

**BIOMARKER AND METABOLITES QUANTIFICATION AT THE FEMTOGRAM LEVEL**

Indicia Biotechnology gives access to a new high performance technical platform:

**ERENNA® SINGULEX**

Biomarker quantification at the femtogram level

**SERVICES**

Assay development

Bioanalysis

Biomarkers

Immunogenicity

Companion tests/IVD

Quality control

**TECHNOLOGIES**

NEW

Singulex®

Luminex®

ELISA/EIA

Rapid tests

Coated particles

Antibodies

**A UNIQUE PLATFORM IN EUROPE FOR:**

- ✓ **CUSTOM IMMUNOASSAY DEVELOPMENT**, optimization and validation (answering specific bioindustries needs, like biologics measures for PK studies)
- ✓ **SAMPLE ANALYSIS OF BIOMARKERS** in sera, plasma, biopsy, supernatant of cell culture for research, preclinical & clinical studies with new reagents or current assay menu
- ✓ **EXTENSIVE CURRENT ASSAY MENU** for sample analysis, covering several disease topics
  - CNS
  - INFLAMMATION
  - ONCOLOGY
  - CARDIOVASCULAR
  - METABOLIC

**MAIN ADVANTAGES**

- ✓ Very low limit of quantification:
  - Femtogram (10<sup>-15</sup>g/ml) level measurement
  - Detection of very small changes in biomarker concentrations
  - Analysis of complex biological samples
- ✓ Large dynamic range (4+ logs)
- ✓ Optimized signal vs noise ratio
- ✓ 96-wells microplate format
- ✓ Address unmet diagnostic needs

**Indicia Biotechnology**

33, avenue de la Californie  
69600 Oullins – France  
Tel: +33(0)4 72 39 14 92  
Fax: +33(0)4 72 39 16 01

Indicia Biotechnology is a **Contract Research Provider** specialized in immunotechnology.

The company provides to biopharmaceutical & diagnostic companies:

- ✓ R&D contract services (research and development of bioanalytical methods)
- ✓ Bioanalytical services

For any further information, please contact:
