

## Our production services

From development to industrial production, Indicia Biotechnology accompanies its customers and answers their requirements.

### Access to tailor-made and controlled production Save time and acquire external manufacturing capabilities

#### Facilities

- 3,000 sq.m manufacturing facilities located close to Lyon - France
- 400 sq.m cleanroom
- Biosafety Level 2 laboratory
- 2,000 sq.m storage facilities

#### Quality Assurance and Regulatory Affairs

Indicia Biotechnology's production site complies with ISO 9001:2000 and EN ISO 13485:2004 international quality standards. We also meet GMP guidelines if required. Our quality system and our knowledge in regulatory affairs are under constant review in order to improve and meet customer satisfaction.

#### Our offer

Indicia Biotechnology provides custom-made liquid reagents and sterile solutions for IVD, pharmaceutical and cosmetic companies. Our offer includes:

#### 1- Formulation

Following your specifications, Indicia Biotechnology realizes simple or more complex and varied formulations in industrial tanks.

#### 2- Aseptic or sterile filling

Batches from 1 to 1,000 liters  
Repartition capabilities around 10,000 units, depending on the type of packaging.

#### 3- Quality control testing

Control of raw materials in compliance with the European Pharmacopoeia (if needed) and release tests on finished products. Current controls: pH measurement, sterility, conductivity, titration, osmolarity, environmental control...and more if required.

#### 4- Primary packaging

Tubes, bottles, and bags

#### 5- Labelling

According to customers specifications: product name, customer reference, internal batch number and/or customer batch number, peremption date, storage conditions, risks labels (for example: toxic, flammable, corrosive,...)

#### 6- Secondary & external packaging

Final packaging on filmed pallets

#### 7- Distribution to the customer's site

Choice of the carrier  
Controlled temperature possible  
Deliveries on specific days and hours

### Categories of products

**Pharmaceutical raw materials, In Vitro Diagnostic reagents, hygiene and disinfection products for industries, Media Fill for process simulation...**
